The case closed with the presentation to Judge Hapai of a box of his favorite cigars. He made an appropriate response. Judge Hapai has served as District Judge for 26 consecutive years. Before his service on the bench he was clerk to the Sheriff of Hawaii, Tax Collector and Deputy Lieutenant Governor of this island.

## Hilo Party Come Home Without Reaching Top of Big Crater.

Postmaster W. I. Madeira, William Weight and D. S. Bowman made an ineffectual attempt to reach the volcano by the Kaunama route, starting last Saturday morning and returning Wednesday night. They could easily have reached the summit had not their water supply failed them. They passed Dewey crater, above which the mountain side was hot and steaming, evidently from fires seeking to escape near the spot where the 1899 out break occurred. This heat had driven the ice and water from the crevices and for two days the little party tramped and stumbled over aa pahoehoe, climbing the almost endless incline up the long mountain.

They left their horses near Aina Hou at noon Sunday and started on foot. They walked Sunday. They walked Monday. They slept in lava caves and revelled in the beauty of the volcano display above them. Monday evening when but a short distance from the goal they took stock and found their water supply short. Reluctantly they started home. Their report of steam and heat above the Dewey crater gives authenticity to the story that smoke was seen coming from the side of the mountain on the Hilo side yesterday afternoon.

## Volcano Statistics.

In the light of the present activity of the volcano of Mauna Loa, a few comparisons may prove interesting:

Elevations—Mauna Kea, 13,805 feet; Mauna Loa, 13,675 feet; Haleakala, 10,033 feet; Kilauca, 4,040 feet.

The dimensions of these principal volcanoes of the Hawaiian Islands are as follows:

Crater of Haleakala—Extreme length, 39,500 feet or 7.48 miles; extreme width, 12,500 feet or 2.37 miles; area, 19 square miles or 12,160 acres.

Crater of Kilauca (Halemauau)—Approximately two miles wide and three miles long, containing an area of 2,650 acres.

Crater of Mauna Loa (Mokuawewe)—The eruption from which is at the present time attracting the attention of tourists and the people of the islands is 3.7 square miles in area, or 2,370 acres. It is oblong in shape, being 3.7 miles long and 1.74 miles in width. When not in an active state, the bottom of the crater is from 1,200 to 1,500 feet below the summit. This vast cauldron must be filled before there can be any overflow from the top, and hitherto before the molten lava has reached the crater's rim, the pressure from the immense reservoir of lava has caused an outbreak from a fissure in the mountain's side several hundred feet below. In the present eruption this cataclysm has not yet taken place, and the people await with lively anticipation on this event, which is always spectacular and thrilling.

## Funacoshi Again in Jail.

Deputy Sheriff Overend returned the first of the week from Naalehu with Funacoshi, the notorious Japanese criminal, who has been before the bar of justice for a year. Funacoshi was out on \$10,000 bail pending appeal to the Supreme Court from a judgement by the Hilo Court, finding him guilty of murder. He is now arrested on the charge of conspiracy to extort money. His case came before Judge Hapai Wednesday and he was remanded for trial. Funacoshi has been playing a hard game in the Hawaiian Islands against big odds, and it is said that now, for the first time, the "grand old man" is inclined to show the feather. When talking with friends, the stoicism that carried him through many trials, now deserts him and he weeps like a broken-hearted old man.

## KOHALA BASE BALL.

## Boys Want to Play the Game on Sunday as Elsewhere.

Senator Palmer P. Woods telephoned the TRIBUNE one day this week that the Kohala baseball boys were in a nasty frame of mind because the authorities refused to permit Sunday ball at the new Kohala ball ground. The boys have recently expended between three and four hundred dollars on a new ball park. The Senator says nearly all the boys are working through the week and that Sunday is the only day they can play. The boys want to know why Sunday ball is O. K. in Hilo, Honolulu and on Maui and Oahu at Kohala.

The rule so far as can be found out, is that Sunday ball will not be interfered with where popular sentiment upholds it. It has been suggested that the Kohala boys circulate a petition on the subject and that there will be little doubt of Sunday ball being permitted, so long as the games are orderly and not too noisy.
